

I work as an EU project consultant, supporting organisations and partnerships in preparing applications for EU-funded programmes. I bring more than 15 years of experience across education, public sector, business, innovation, EU-funded project development, and science engagement. I have worked with mission-aligned initiatives connected to EU Priority Missions and I have a solid understanding of EU funding programmes, policies, programme requirements, and evaluation expectations.

COLLABORATION MODELS

To ensure clarity of roles, responsibilities, and work processes, I offer three collaboration models.

Model A: Grant writing

In this model, I write the application in collaboration with the project partnership.

SCOPE

- **Concept formulation (*if required*)**

Where a project idea is not yet sufficiently defined, concept formulation is required before writing can begin.

This includes:

- up to three working sessions with the client or partnership
- clarification of problem framing, objectives, and approach
- development of a project concept note forming the basis of the further application

- **Proposal drafting and refinement**

The writing process is based on input from the partnership, including:

- understanding of target groups and needs
- planned activities and intended outputs
- partner information, roles, and responsibilities
- relevant additional material

I refine, structure, and integrate these inputs into a coherent application narrative and provide proposal-level recommendations where needed to ensure alignment with programme requirements and evaluation criteria.

- **Budget alignment**

- Budget preparation and financial calculations are handled by the project's financial manager
- I review the narrative and activity descriptions to ensure consistency with the proposed budget at application level

- **Working method**

- Application writing is carried out in a shared document
- Leading partner can add their input where relevant
- All contributions are integrated into a consistent structure, logic, and narrative

- **After submission**

- Post-submission involvement is available under a separate agreement.

Model B: Proposal writing guidance and application review

This model is intended for partnerships that prepare the application internally and require external guidance and review.

SCOPE

- Review of the draft application prepared by the client's team
- Concept refinement and strengthening of the logical structure
- Narrative improvements to enhance clarity, coherence, and positioning
- Recommendations related to relevance, outputs, dissemination, or alignment with EU programme specifics

After submission

- Post-submission involvement is available under a separate agreement.

Model C: Project supervision

This model provides post-funding strategic support to ensure the project remains aligned with its approved concept, application commitments, and intended impact.

SCOPE

- Strategic oversight throughout project implementation
- 1-4 days per month, agreed in advance
- Guidance and feedback on activities, material development, and dissemination work
- Review of reports prior to submission

Optional support

- Dissemination and impact strategy development
- Audiovisual media and content production for dissemination stage
